Education

Dr. A.P.J. Abdul Kalam Technical University — Location
Master of Technology in Computer Science — 07/2025 - Present

Dr. A.P.J. Abdul Kalam Technical University — Lucknow, UP
Bachelor Technology in Computer Science — 07/2021 - 07/2025

Sarvodaya Public School (CBSE Board) — Tatiri,Baghpat
Secondary & Senior Secondary — 03/2019 - 05/2021

Skills

Frontend: React · React Native · Redux · Expo · JavaScript · Tailwind CSS · HTML · CSS

Backend: Node.js · express · Python · Flask · Socket io · Postman · REST API · Razorpay · Web RTC

Database: SQL · MongoDB

Tools: Git · GitHub · Docker

Experience

Eastman Auto & Power Limited — Delhi, India
Full Stack Software Developer — 10/2025 - Present

A leading Indian company specializing in **power storage, energy solutions, and automotive batteries**. It operates across both **automotive** and **power/energy** domains, serving domestic and international markets.

- Built full-stack applications for **IoT-enabled automotive systems**, handling real-time data ingestion, processing, and storage.
- Worked on live device data integration, database optimization, and performance-focused backend services.

GeeksforGeeks — Noida, India
Intern — 08/2024 - 02/2025

A leading Indian ed-tech organization focused on delivering high-quality computer science education, coding resources, and industry-relevant training for software engineers.

- Completed a structured **6-month full-stack development training and internship**, gaining hands-on experience in frontend, backend, and database technologies.
- Developed responsive web applications using modern frontend frameworks and implemented RESTful APIs for backend services.
- Worked on CRUD-based modules, authentication flows, and database design to support real-world application use cases.

Projects

Solar Merchant App

Mobile Application

- Built a real-time solar and inverter monitoring mobile app using React Native (Expo) with Tailwind CSS for responsive UI.
- Developed scalable backend APIs with Node.js and Express, and managed live data using MySQL for efficient performance tracking.
- Tech Stack: React Native (Expo), Tailwind CSS, Node.js, Express.js, MySQL

Solar Inverter Control Panel

Web Application

- Enabled real-time monitoring and control of multiple solar inverters by processing live MQTT data streams and presenting actionable insights through a responsive web dashboard.
- Built a real-time solar inverter monitoring and control dashboard using **React, Redux,Tailwind CSS, Node.js, Express, and MQTT**, handling live data from multiple devices.

Multi-User Real-Time Chat Application

Web Application

- Designed and developed a real-time multi-user chat system using Socket.IO to enable instant messaging and live user communication.
- User interface with React and Tailwind CSS,backend using Node.js and Express, handling socket connections, message broadcasting, and user sessions.

Certificates

Geeks for Geeks —
- Completed a structured **6-month full-stack development training and internship**, gaining hands-on experience in frontend, backend, and database technologies.
- Developed responsive web applications using modern frontend frameworks and implemented RESTful APIs for backend services.

Kryptora infotech Pvt.Ltd — Completed a structured **Basic and Advanced Python training**, gaining hands-on experience with core Python concepts, data manipulation, and backend development.
Built data-driven applications using **NumPy and Pandas** for data processing, **Matplotlib** for visualization, and **Flask** for developing RESTful web applications.

Kryptora infotech Pvt.Ltd — Completed structured training in **C programming**, gaining hands-on experience with core concepts including data types, control structures, functions, pointers, and memory management.
